

CAS Series: The Reference for Spectral Measurement

Light Measurement from UV to IR

- » High-end stabilized detector array
- » “Plug & play” accessory identification
- » Down to 10 μ s integration time
- » High modularity and measurement accuracy
- » Spectrograph with minimum stray light and enhanced throughput
- » Integrated density filter wheel
- » Fiber coupled accessories
- » Optional stray light correction (SLC)

**Large global customer base,
worldwide service!**
